# Software Applications

Using generative AI in software applications

## Examples of software applications

### Writing

Is there parking for staff?

Yes, employees can park on levels 1 and 2 of the office lot. You can get a sticker at [...]

### Reading

Classify the sentiment of the following review as either positive or negative:

The mochi is excellent!

#### **Positive**

### Chatting

Welcome to BettaBurgers!

I'd like a cheeseburger for delivery!

Awesome. Anything else?

That's it thanks!

Ok, it'll be there in 20 minutes. Enjoy!

```
import torch
    from torch.utils.data import DataLoader, TensorDataset
    from torch import nn
    class SentimentLSTM(nn.Module):
        def __init__(self, vocab_size, output_size, embedding_dim, hidden_dim, n_layers):
            super(SentimentLSTM, self).__init__()
            self.output_size = output_size
            self.n_layers = n_layers
10
            self.hidden_dim = hidden_dim
11
12
            self.embedding = nn.Embedding(vocab_size, embedding_dim)
            self.lstm = nn.LSTM(embedding_dim, hidden_dim, n_layers, batch_first=True)
13
14
            self.fc = nn.Linear(hidden dim, output size)
15
            self.sigmoid = nn.Sigmoid()
17
        def forward(self, x, hidden):
            batch_size = x.size(0)
18
19
            x = self.embedding(x)
            lstm_out, hidden = self.lstm(x, hidden)
20
21
            lstm_out = lstm_out.contiquous().view(-1, self.hidden_dim)
22
            out = self.fc(lstm out)
23
            out = self.sigmoid(out)
24
            out = out.view(batch_size, -1)
            out = out[:, -1]
25
            return out, hidden
27
        def init_hidden(self, batch_size):
28
            weight = next(self.parameters()).data
29
            hidden = (weight.new(self.n_layers, batch_size, self.hidden_dim).zero_(),
30
```

# Supervised learning for restaurant reputation monitoring

Input (A)	Output (B)
Best soup dumplings I've ever eaten.	Positive
The colorful tablecloths made me smile!	Positive
Not worth the 3 month wait for a reservation	Negative

Input: "Best bubble tea I've ever had"

**Output: Positive** 

## Prompt-based development

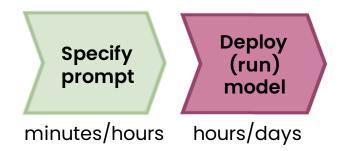

```
prompt
    Classify the following review
    as having either a positive or
                                                 Instruction text
    negative sentiment:
    The banana pudding was really
                                                 Review text
    tasty!
** ** **
response = llm response(prompt)
                                                 Code to call LLM
print(response)
                                                Code to print output
```

## Workflow using Generative Al

Supervised learning

Prompt-based Al

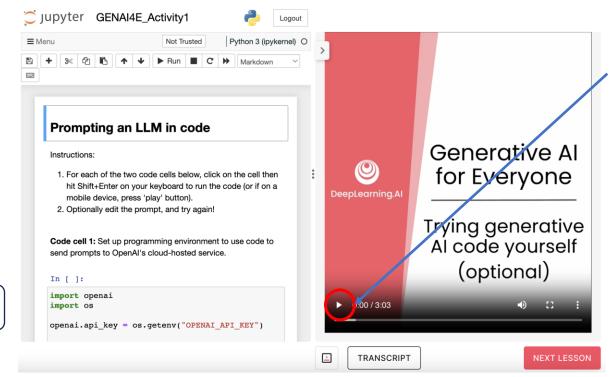

# Software Applications

Trying generative AI code yourself (optional)

## Coding platform (Jupyter notebook)

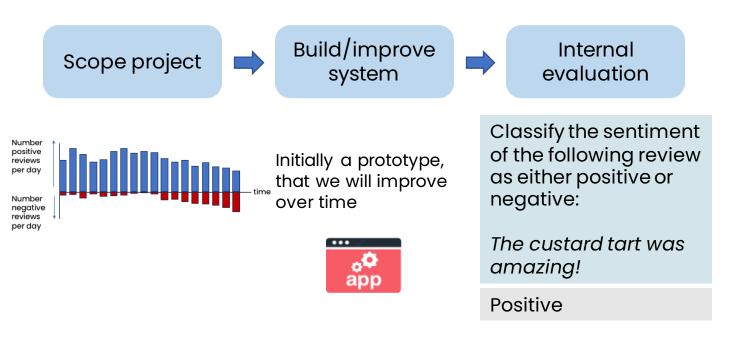

Play button

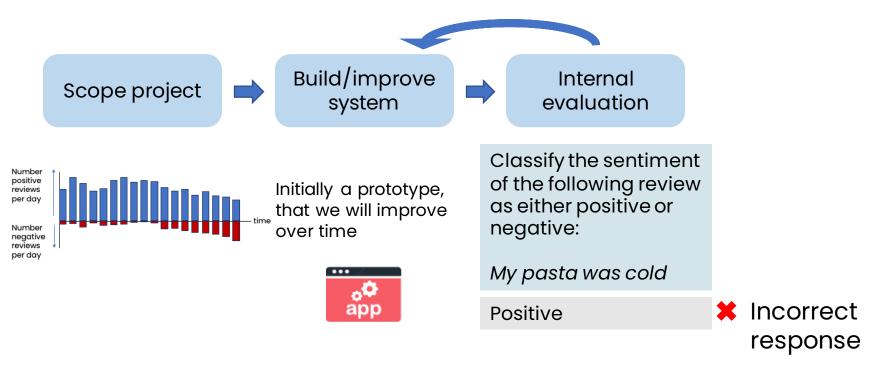

The one command to know:

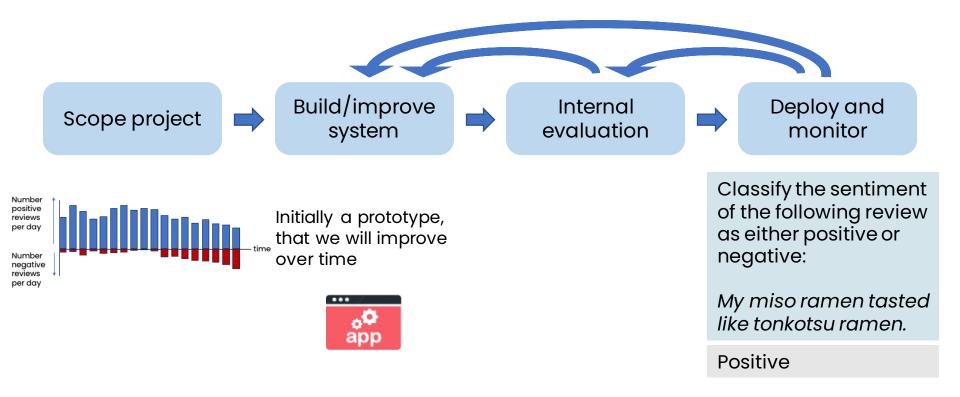

shift + enter

# Software Applications

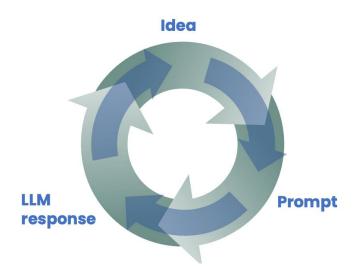

Building Generative AI is a highly empirical (experimental) process – we repeatedly find and fix mistakes.

Prompting

Building Generative AI is a highly empirical (experimental) process – we repeatedly find and fix mistakes.

- Prompting
- Retrieval augmented generation (RAG)
  - Give LLM access to external data sources

  - Train LLM from scratch

Take food order

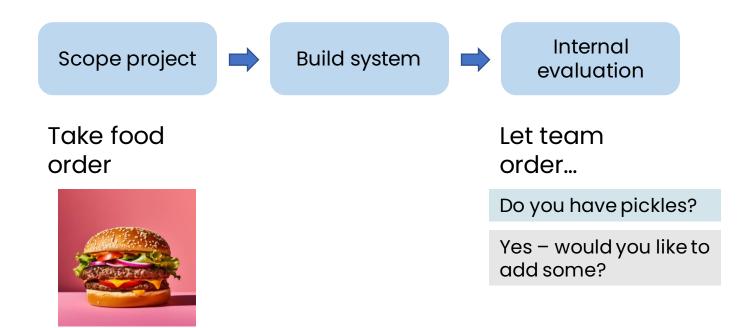

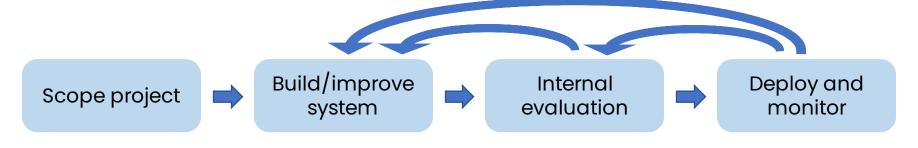

Let team order...

I'd like a mushroom and swiss burger

I'm sorry, we don't have mushrooms, how about onions?

Incorrect response

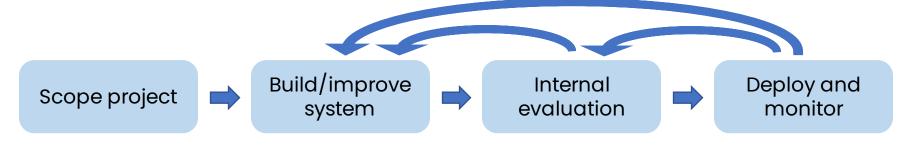

Take food order

Let customers order, monitor LLM responses

How many calories in the cheeseburger?

I'm sorry, I don't know

Take food order

Let customers order, monitor LLM responses

How many calories in the cheeseburger?

About 375 calories

# Software Applications

Cost intuition

### How much does it cost?

## Example prices

	OpenAI/GPT3.5	OpenAI/GPT4	Google/PaLM2	Amazon/Titan Lite
Input tokens	\$0.0015/1K tokens	\$0.03/1K tokens	\$0.0005/1K tokens	\$0.0003/1K tokens
Output tokens	\$0.002/1K tokens	\$0.06/1K tokens	\$0.0005/1K tokens	\$0.0004/1K tokens

### What is a token?

the example Andrew 1 token

translate programming 2 tokens

tonk<mark>otsu</mark> 4 tokens Roughly, 1 token = 3/4 words

300 words 400 tokens

## **Estimating Cost**

Typical adult reading speed: 250 words/minute.

How much would it cost to keep someone occupied for 1 hour?

$$60 \times 250 = 15,000 \in \text{output}$$
 $+15,000 \in \text{prompt}$ 
 $30,000$ 

1 token  $\approx \frac{3}{4}$  word

 $40,000$  tokens

(ost: \$0.002 cents / | K tokens.

\$0.002 \times 40 = \$0.08

Retrieval Augmented Generation (RAG)

## Retrieval Augmented Generation (RAG) example

#### **General Chatbot**

Is there parking for employees?

I need more specific information about your workplace to answer that question.

#### **Chatbot with RAG**

Is there parking for employees?

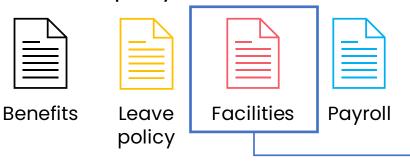

Yes, employees can park on levels 1 and 2 of the office lot. You can get a sticker at [...]

# Retrieval Augmented Generation (RAG) example

1. Given question, search relevant documents for answer

Is there parking for employees?

Company documents

2. Incorporate retrieved text into an updated prompt

Use the following pieces of context to answer the question at the end.

Parking Policy: All employees may park on levels 1 and 2 of the office lot. Use the entrance on Front St [...]

Is there parking for employees?

# Retrieval Augmented Generation (RAG) example

3. Generate answer from the new prompt with additional context

Use the following pieces of context to answer the question at the end.

Parking Policy: All employees may park on levels 1 and 2 of the office lot. Use the entrance on Front St [...]

Is there parking for employees?

Yes, employees can park on [...] 1 Link to full onboarding policy

## Examples of RAG applications

### Chat with PDF files

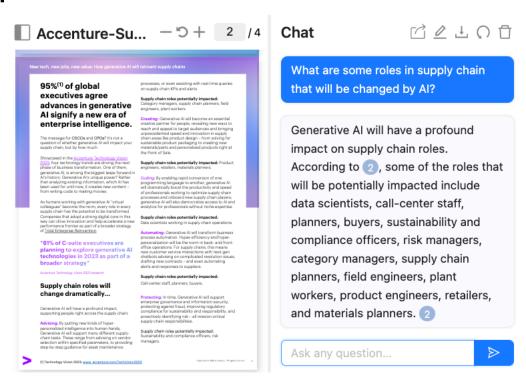

docAnalyzer.Al

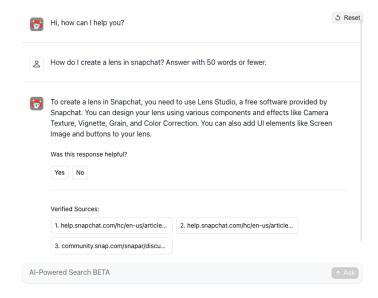

Chatting with an Accenture report using ChatPDF

## Examples of RAG applications

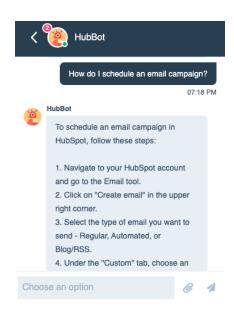

### Answer questions based on a website's articles

Coursera Coach

Snapchat

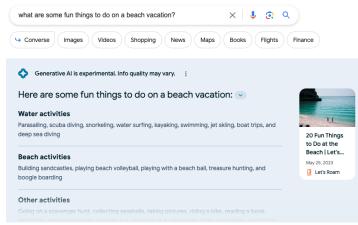

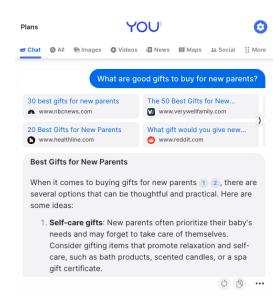

Hubspot

## Examples of RAG applications

### New form of web search

Microsoft/Bing Chat

Google

You.com

## Big Idea: LLM as reasoning engine

- LLMs have a lot of general knowledge, but they don't know everything
- By providing relevant context in the prompt, we ask an LLM to read a piece of text, then process it to get an answer
- We're using it as a reasoning engine to process information, rather than using it as a source of information

# Advanced Technologies: Beyond Prompting

Fine-tuning

## Pretraining and Fine-tuning

Pretraining

Fine-tuning

My favorite food is a bagel with cream cheese

What a wonderful chocolate cake The novel was thrilling

Input (A)	Output (B)	Input (A)	Output (B)
My favorite food is a	bagel	What	а
My favorite food is a bagel	with	What a	wonderful
My favorite food is a bagel with	cream	What a wonderful	chocolate
My favorite food is a bagel with cream	cheese	What a wonderful chocolate	cake

Learns from 100Bs of words

Learns from 1000s to 10,000s of words

## Why fine-tune?

To carry out a task that isn't easy to define in a prompt. Example 1: Summarize in certain style or structure

Customer: Hi, my monitor won't turn on.

Agent: I'm sorry to hear that.
What model is it?
Customer: It's the 27-inch 4K.
Agent: Can you tell me the
model number?

Customer: Hang on one sec...I'm looking on the back...it's the MK401-27X.

Agent: Ok, thank you. Can you try unplugging the HDMI cable

and reinserting?
Customer: Ok, doing that
now. Hmm, the image
appeared for a few seconds
then disappeared.
Agent: Ok, try jiggling the
cable while it is in the socket.
Customer: Oh, I see the
image coming and going.
Agent: Ok, I think you have a
defective cable. We will send
you a replacement.

Customer tells agent about a problem with monitor.

## Why fine-tune?

To carry out a task that isn't easy to define in a prompt. Example 1: Summarize in certain style or structure

Customer: Hi, my monitor won't turn on.

Agent: I'm sorry to hear that.
What model is it?
Customer: It's the 27-inch 4K.
Agent: Can you tell me the
model number?
Customer: Hang on one sec...I'm

MK401-27X. Agent: Ok, thank you. Can you try unplugging the HDMI cable

looking on the back...it's the

and reinserting?
Customer: Ok, doing that
now. Hmm, the image
appeared for a few seconds
then disappeared.
Agent: Ok, try jiggling the
cable while it is in the socket.
Customer: Oh, I see the
image coming and going.
Agent: Ok, I think you have a
defective cable. We will send
you a replacement.

MK401-27KX was reported as broken by customer 5402. Cable identified as problem. Replacement issued.

To carry out a task that isn't easy to define in a prompt. Example 2: Mimicking a writing or speaking style

Write a speech about generative Al in the voice of Andrew Ng

Write a speech about generative Al in the voice of Andrew Ng

Hello everyone, I'm Andrew Ng, and I'm here today to talk to you about generative Al. Generative Al is a type of artificial intelligence that can create new content [...]

Hey everyone, good to see all of you. So, what I want to do today, is share some thoughts with you about how generative AI is going to change the way that your company [...]

Pretrained model

Fine-tuned model

To help LLM gain specific knowledge.

Medical notes

Pt c/o SOB, DOE. PE: RRR, JVD absent, CTAB. EKG: NSR. Tx: F/u w/ PCP, STAT CXR, cont. PRN O2.

Extract from admission note for patient with shortness of breath

To help LLM gain specific knowledge.

Legal documents

Licensor grants to Licensee, per Section 2(a)(iii), a non-exclusive right to use the intellectual property, contingent upon compliance with fiduciary duties outlined in Section 8, paragraphs 1-4, and payment as specified in Schedule B, within 15 days hereof.

To help LLM gain specific knowledge.

Financial documents

Counterparties engaged in OTC derivatives transactions must comply with margin requirements pursuant to Regulation (EU) No 648/2012, including initial and variation margin calculations."

To get a smaller model to perform a task.

Large model: Small model: 100B+ parameters 1B parameters

- Lower cost/latency to deploy
- Can run on mobile/laptop (edge devices)

Classify the following review as having a positive or negative sentiment:  Really enjoyed my vegetable biryani	Classify the following review as having a positive or negative sentiment:  The noodle soup was too salty	Classify the following review as having a positive or negative sentiment:  The staff sang happy birthday to me!
Positive	Negative	Positive

Can work well with 500-1000 examples.

# Advanced Technologies: Beyond Prompting

Pretraining an LLM

## When should you pretrain an LLM?

Many teams are pretraining general-purpose LLMs by learning from internet text.

May take \$10s of millions, many months, huge amount of data

For building a specific application:

- Option of last resort
- Could help if have a highly specialized domain

Introducing BloombergGPT, Bloomberg's 50-billion parameter large language model, purpose-built from scratch for finance

**Bloomberg** 

March 30, 2023

# Advanced Technologies: Beyond Prompting

Choosing a model

#### Model size

1B parameters: Pattern matching and basic knowledge Restaurant of the world. review sentiment

10B parameters: Greater world knowledge. Can follow basic Food order instructions. chatbot

100B+ parameters: Rich world knowledge. Complex reasoning. Brainstorming partner

## Closed or open source?

<u>Closed-source models</u> (Cloud programming interface)

- Easy to use in applications
- More large/powerful models
- Relatively inexpensive
- Some risk of vendor lock-in

#### Open-source models

- Full control over model
- Can run on your own device (on-prem, PC, etc.)
- Full control over data privacy/access

# Advanced Technologies: Beyond Prompting

How LLMs follow instructions: Instruction tuning and RLHF (optional)

## How do chat systems learn to follow instructions?

#### Pretraining

My favorite food is a bagel with cream cheese

# Reinforcement learning from human feedback (RLHF)

#### Helpful, Honest, Harmless

Step 1: Train an answer quality (reward) model

Prompt: Advise me on how to apply for a job.

Input (A)	Output (B)
Response	Score (reward)
I'm happy to help! Here are some steps to follow []	5
Just try your best!	3
It's hopeless – why bother?	1

Step 2: Have LLM generate a lot of answers. Further train it to generate more responses that get high scores.

# Advanced Technologies: Beyond Prompting

Tool use and agents (optional)

## Tool use for food order taking

Send me a burger!

Ok, it's on the way!

## Tool use for food order taking

Passed to restaurant ordering system: Send me a burger! You have ordered: ORDER (Burger, 9876, 1 burger y Street 1234 My Street) for delivery to: User message: 1234 My Street Ok, it's on the way as response Is this correct? (If yes, your credit card will be charged) Ok, it's on the way! es.

## Tools for reasoning

How much would I have after 8 years if I deposit \$100 into a bank account that pays 5% interest?

After compounding \$100 at 5% interest for 8 years, you would have \$147.04 dollars.

X Incorrect value

LLMs are not great at precise math

## Tools for reasoning

How much would I have after 8 years if I deposit \$100 into a bank account that pays 5% interest?

After compounding \$100 at 5% interest for 8 years, you would have CALCULATOR(100 \* 1.05^8) dollars.

After compounding \$100 at 5% interest for 8 years, you would have 147.74 dollars.

External calculator program

100 \* 1.05^8 = 147.74

### Agents

- Use LLM to choose and carry out complex sequences of actions
- Cutting edge area of Al research

Help me research BetterBurgers top competitors

Here are steps I need to carry out to research competitors:

- 1. Search top competitors
- 2. Visit web site of each competitor
- 3. For each competitor, write summary based on homepage content

→ SEARCH("BetterBurgers Competitors")

VISIT(http://www.fastburger.com)

VISIT(http://www.burgerworld.com)

•••

Summarize the following text:

At Fast Burger, we pride ourselves on the speed of our delivery ...
